

BY CHUNAUTI JAIN
4th YEAR, SEM- VIIth

Well, if you are a similar kind of person who is curious about your surroundings, then you might just be interested in learning how to improve them. As an architect you would have the power and the responsibility to shape the environment in which people span their daily lives. This makes architecture one of the most influential professions in today's society. We are living in a rapidly changing world, and so we need people with the imagination to create the buildings and cities our society needs to keep pace with progress. GUWAHATI COLLEGE OF ARCHITECTURE is an initiative in the northeast to produce people who have the vision of creating something beautiful, something meaningful.

As from my personal experience here I have learnt to focus on real world relevance, stressing technical, environmental, economic, social, cultural, aesthetic, and ethical concerns in everything I deal with.

The various practical trainings field works conducted by our college has helped me evolve & broaden my intellectual levels & think out of the box. And now I am definitely a more confident person.

“Every time a student walks past a really urgent, expressive piece of architecture that belongs to his college, it can help reassure him that he does have that mind, have that soul”.
....LOUIS KAHN

THANK YOU
